## DETAILED ACTION

### *Specification*

1. The abstract of the disclosure is objected to because Abstract should be concise ranging from 50-150 words. Correction is required. See MPEP § 608.01(b).
2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

Extensive mechanical and design details of apparatus should not be given.

### *Allowable Subject Matter*

3. The following is an examiner's statement of reasons for allowance: Claims 1-20 are allowed over the prior art of record. Independent claims 1, 14 and 17 each recites "a first roller cam follower assembly rotating a first contactor element from a neutral position to an active first contactor position as a first roller cam follower moves..." The claimed structural movements are neither disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

As stated above.
